Vision Statement: *Lead with Humility + Serve with Love + Trust in Providence*

Mission Statement: St. Theodore Guerin High School is a Roman Catholic college preparatory school serving students from diverse backgrounds and preparing them to be tomorrow's leaders through academics and faith formation.

The Philosophy of Education of Saint Theodore Guerin High School

The school's commitment:

Saint Theodore Guerin High School, founded as a Catholic, college preparatory, diocesan high school, is committed to academic excellence as defined by the following:

- courses inspired and taught from a Catholic worldview, based on the Christian concept of the human person, and in communion with the Magisterium of the Church always seeking wisdom and truth
- culture for learning that stretches students beyond what they believed possible to prepare them for college and life
- a liberal arts curriculum that challenges students not simply to absorb information but also to articulate, apply, and evaluate information
- a variety of teaching methodologies
- the fostering of active learning whereby students take part in the educational process enabling them to become critical thinkers and life-long learners

The students' commitment:

Students at Saint Theodore Guerin High School are expected to focus on spiritual and academic growth while discerning and developing their God-given potential. Students are obliged to do the following:

- grow in their faith
- invest in each academic discipline by setting personal goals and expectations
- take an active role in the educational process by:
 - participating in class discussions
 - claiming ownership of their work and showing a desire to learn
 - thinking critically
 - taking risks and not settling for the easy answer
 - advocating for learning needs
 - encouraging fellow students to push themselves academically
- work toward learning independence and self-management
- develop leadership qualities through service to others

The parents' commitment:

Saint Theodore Guerin High School presumes parents to have the primary and inalienable right to educate their children. Thus, parents are important partners in the educational process. In working together to prepare tomorrow's leaders, parents are expected to do the following:

- model Christian values and support the students' spiritual growth
- recognize that the school is a community of people who have been called by God to this vocation and are working in the best interest of the students
- communicate directly, openly, and honestly with the school faculty and staff
- counsel their students on constructive ways to work through the challenges associated with high expectations inherent in a college-preparatory curriculum
- help their students set realistic priorities and develop self-management skills
- partner with faculty and staff in fulfilling this philosophy of education

Additional Requirements for **All Diplomas**:

- Take 2 trimesters of math during the senior year (6 math credits must be earned in grades 9-12)
- Take either 2 trimesters of science or 2 trimesters of world language during the senior year
- Complete 120 service hours
- Complete Graduation Pathways
- Be in good behavioral standing and current with financial obligations

Additional Requirements for the **Academic Honors Diploma**:

- Have a grade point average of a “B” (3.0) or better
- Complete one of the following:
 - Earn a composite score of 1250 or higher on the SAT and a minimum of 560 on math and 590 on the evidence based reading and writing section.
 - Earn an ACT composite score of 26 or higher and complete written section.
 - Earn 4 credits in 2 or more IB courses and take corresponding IB exams
 - Earn 6 verifiable transcribed college credits in dual credit courses from the approved dual credit list
 - Complete both of the following:
 - A minimum of 3 verifiable transcribed college credits from the approved dual credit list,
 - Earn 2 credits in IB courses and take corresponding IB exams

Additional Requirements for the **International Baccalaureate (IB) Diploma**:

- Complete all of the course requirements for the International Baccalaureate Diploma, including internal and external assessments for six IB courses
- Achieve the minimum point values set by the International Baccalaureate Organization on all assessments
- Complete 60 Guerin service hours and a Creativity, Action, and Service (CAS) Project, as per the International Baccalaureate Organization
- Submit an original Extended Essay
- Complete the Theory of Knowledge course

BUSINESS, MARKETING, AND INFORMATION TECHNOLOGY

Required Courses

Digital Applications and Responsibility

Grades 9 **1 credit**

Prerequisite: None

Also offered as a blended Summer School course to incoming freshmen or those needing credit recovery.

Digital Applications & Responsibility prepares students to use technology in an effective and appropriate manner in school, in a job, or in everyday life. Students develop skills related to word processing, spreadsheets, presentations, and communications software. Students learn what it means to be a good digital citizen and how to use technology, including social media, responsibly. Students expand their knowledge of how to use digital devices and software to build decision-making and problem-solving skills.

Elective Courses

Business and Management, Standard Level, International Baccalaureate

Grades 11-12 **2 credits**

Prerequisite: None

Business and Management examines the role of individuals and groups in forming organizations and their roles within organizations. Students gain a broad understanding of the variety of organizations that exist including profit and non-profit and the problems and life cycles of these organizations. This course develops an understanding of the interdependency of organizations, the effect of problem-solving, and the application of organizational principles and techniques widely practiced in the process of decision-making. Students will demonstrate the application of business and management tools, techniques, and theories on a real business issue or problem.

Computer Science, Standard Level, International Baccalaureate

Grades 11-12 **2 credits**

Prerequisite: Introduction to Computer Science

Computer Science Standard Level, International Baccalaureate guides students through problem-solving strategies and definitions to the construction of algorithms to create solutions, thereby developing skills of logic and analytical thinking. The course includes systems life cycle and software development, program coding and construction, computing system fundamentals, a case study, and a program dossier. Students will be required to fulfill all requirements of the IB organization, including participation in the IB summative test in May. This course is recommended for students interested in Engineering, Math, Technology, or Physics-related fields.

Introduction to Accounting

Grades 10-12 **1 credit**

Prerequisite: None

Introduction to Accounting introduces the language of business using Generally Accepted Accounting Principles (GAAP) and procedures for proprietorships and partnerships using double-entry accounting. Emphasis is placed on accounting principles as they relate to both manual and automated financial systems. This course involves understanding, analyzing, and recording business transactions and preparing, analyzing, and interpreting financial reports as a basis for decision-making.

Introduction to Business

Grades 10-12 **1 credit**

Prerequisite: None

Business Foundations is the introductory business course that provides the framework for future business courses. Students will be introduced to personal finance, communications, ethics, management, marketing, law, economics, insurance, entrepreneurship, and business careers. Using technology, students will demonstrate the knowledge learned by incorporating the above disciplines into a business plan.

Introduction to Computer Science**Grades 10-12** **1 credit****Prerequisite: None**

Introduction to Computer Science allows students to explore the world of computer science. Students will gain a broad understanding of the areas composing computer science. Additionally, there is a focus on the areas of computer programming, gaming/mobile development, and artificial intelligence/robotics. Introduction to Computer Science teaches logical thinking as a universally applicable skill in all subject areas.

Personal Financial Responsibility**Grades 10-12** **1 credit****Prerequisite: None**

Personal Finance is a course designed to introduce personal financial planning, financial services, budgeting, investments, and insurance protection. Students will attain the knowledge of financial concepts including credit management, consumer rights and responsibilities and decision-making skills for all aspects of life as consumers, producers, entrepreneurs, and economic citizens

Sports and Entertainment Marketing**Grades 10-12** **1 credit****Prerequisite: None**

Marketing (Sports, Recreation and Entertaining) is a course that provides a basic introduction to the scope and importance of marketing in a global economy. Emphasis is placed on oral and written communications, mathematical applications, problem solving and critical thinking skills as they relate to advertising, promotion, selling, distribution, financing and service management. This course will specialize in the fields of sports, recreation and entertainment by focusing on producing and marketing activities of athletic and entertainment programs for the high school.

ENGINEERING AND TECHNOLOGY

Elective Courses

Principles of Engineering**Grades 10-12** **1 credit****Prerequisite: None**

Principles of Engineering is a course that focuses on the process of applying engineering, technological, scientific and mathematical principles in the design, production, and operation of products, structures, and systems. This is a hands-on course designed to provide students interested in engineering careers to explore experiences related to specialized fields such as civil, mechanical, and materials engineering. Students will engage in research, development, planning, design, production, and project management to simulate a career in engineering. The topics of ethics and the impacts of engineering decisions are also addressed. Classroom activities are organized to allow students to work in teams and use modern technological processes, computers, CAD software, and production systems in developing and presenting solutions to engineering problems.

FINE ARTS - MUSIC

Year-Long Ensembles

GoldenVoice

Grades 9-12

1 credit per year

Prerequisite: Audition in May of the preceding year, select members added throughout the year with special permission from the director

GoldenVoice is an auditioned, mixed-voice concert choir that sings regularly at Guerin Catholic Masses, performs at three department concerts, and sings throughout the year for other various events. Auditions are held in May for the following school year. GoldenVoice is open to freshmen through senior boys and sophomore through senior girls. Members of GoldenVoice are in the Music Kairos, and earn 1 credit per year for involvement in this choir.

Cecilia

Grades 9-12

1 credit per year

Prerequisite: Audition in May of the preceding year, select members added throughout the year with special permission from the director

Cecilia is an auditioned, all-girl concert choir that sings regularly at Guerin Catholic Masses, performs in three department concerts, and sings throughout the year for other various events. Auditions are open throughout the school year by contacting the director. Members of Cecilia are in the Music Kairos, and earn 1 credit per year for involvement in this choir.

Sounds of Providence

Grades 9-12

1 credit per trimester

Prerequisite: Audition in May of the preceding year

Sounds of Providence is a select, auditioned chamber choir that sings regularly at Guerin Catholic Masses, performs at concerts including department concerts, and sings frequently throughout the year for other various school and community events. Auditions are held in May for the following year. Auditions are held in May for the following school year. Members of Sounds of Providence are in the Music Kairos, and earn 1 credit per trimester for involvement in this choir. This class meets during zero period on Monday, Tuesday, Thursday, and Friday mornings.

String Orchestra

Grades 9-12

1 credit per trimester

Prerequisite: Audition in May of the preceding year, select members added throughout the year with special permission from the director

String Orchestra is an auditioned, string ensemble that plays regularly throughout the year at Guerin Catholic Masses, three department concerts, and other various community events. Members of this ensemble should have prior experience on violin, viola, cello, or string bass. This class meets during zero period on Monday, Tuesday, Thursday, and Friday mornings.

Wind Symphony

Grades 9-12

1 credit per trimester

Prerequisite: Audition in May of the preceding year, select members added throughout the year with special permission from the director

Wind Symphony is an auditioned band ensemble that plays the most advanced literature for bands performing in Group I at the ISSMA Concert Band State Qualifying contest. Students perform regularly throughout the year at Guerin Catholic Masses, three departmental concerts, and other various community events. This class provides students with a balanced, comprehensive study of music through the concert band, which develops skills in the psychomotor, cognitive, and affective domains. This performance ensemble is open to students in grades 9 - 12 who play woodwind, brass, bass guitar/string bass, or percussion instruments. The primary goal of this course is to teach students authentic, performance-based musical skills. The curriculum also includes but is not limited to: pep band performances throughout the fall football season, concerts throughout the academic year, ISSMA organized performances such as ISSMA State Qualification Contest, and participation in the ISSMA solo and ensemble, performances at community related events as well as school related events such as parades, pep sessions and commencement ceremonies. Away/overnight trips are possible. The Wind Symphony includes a pep band requirement unless a student has a valid conflict with the pep band season, such as a GCHS fall sport. Students that are

unable to participate in the pep band due to a valid conflict are still eligible for this course, but are excused from pep band commitments.

Beginner Elective Courses

Guitar

Grades 9-12 **1 credit**

Prerequisite: None, no prior musical experience necessary

This course is designed to teach students the fundamentals of music through the study of acoustic or electric guitar. Students will learn technique, chords, notation, and ensemble skills. Students taking this course are provided with a balanced comprehensive study of guitar ensemble and solo literature, which develops skills in the psychomotor, cognitive and affective domains. Instruction is designed to enable students to connect, examine, imagine, define, try, extend, refine, and integrate music study into other subject areas. Student participation will develop elements of musicianship including, but not limited to: (1) tone production, (2) technical skills, (3) intonation, (4) music reading skills, (5) listening skills, (6) analyzing music, and (7) studying historically significant styles of literature as pertaining to guitar ensemble and solo literature. Students develop the ability to understand and convey the composer's intent in order to connect the performer with the audience. Students must perform, with expression and technical accuracy, a large and varied repertoire of guitar ensemble and solo literature that is developmentally appropriate. Evaluation of music and music performances is included. It is strongly recommended to have your own acoustic or electric guitar. Acoustic guitars owned by the school are available upon request.

Piano 1

Grades 9-12 **1 credit**

Prerequisite: None, no prior musical experience necessary

Students taking this course are offered keyboard classes in order to develop music proficiency and musicianship. Students perform with proper posture, hand position, fingering, rhythm, and articulation; study the elements of music as exemplified in a variety of styles, and make interpretive decisions. In this course, students are largely self-directed. They work through a standard Level I piano primer and complete an online level-one theory course. Assessment is based on performance accuracy and theoretical understanding.

Ukulele

Grades 9-12 **1 credit**

Prerequisite: None, no prior musical experience necessary

Please note: Students must provide their own ukulele to participate in this course.

Aloha! Ukulele Ensemble is a course intended for beginner ukulele players who have played ukulele for a while on their own. This class would assist students in getting beyond very basic musicianship skills and provide an opportunity for students to start playing in a group. Student participation will develop elements of musicianship including, but not limited to tone production, technical skills, intonation, music reading skills and analyzing music. The primary goals of this class are to keep the material as accessible, relevant, appropriately paced, and clearly explained as possible, while offering lots of encouragement and building musical community along the way. Students are required to participate in performance opportunities, outside of the school day that support and extend learning in the classroom. Students must furnish their own ukulele and accessories.

Intermediate Elective Courses

Intermediate Chorus

Grades 9-12 **1 credit**

Prerequisite: None, no prior musical experience necessary

Students will display mastery-level musicianship, vocal pedagogy, and sight-reading/singing through ensemble singing, group work, and solo singing for the instructor. Intermediate Chorus provides opportunities for creating, performing, conducting, listening to, and analyzing music. This class will also address students being able to develop the ability to understand and convey the composer's intent in order to connect the performer to the audience. This class continues the

Guerin High School and a competitive format through the Indiana Percussion Association. This ensemble will perform in the IPA competition (4-5) Saturdays of the year in the 2nd & 3rd trimester (Feb-April). Please note that some IPA performance dates will be during the 3rd trimester. Participation in the winter concert, competitive IPA & ISSMA solo and ensemble events are required for a passing grade. Students will rehearse for performances during class daily as well as some after school rehearsals. Students will learn basic fundamentals, comprehensive warm-ups, a 4-6 minute competitive show, and noncompetitive winter concert music.

Piano 2

Grades 9-12

1 credit

Prerequisite: Electric Keyboard I, placement test or teacher recommendation

Piano and Electronic Keyboard is based on the Indiana Academic Standards for High School Music Technology and Instrumental Music. Students taking this course are offered keyboard classes in order to develop music proficiency and musicianship. Students perform with proper posture, hand position, fingering, rhythm, and articulation; compose and improvise melodic and harmonic material; create and perform simple accompaniments; listen to, analyze, sight-read, and study a variety of keyboard literature; study the elements of music as exemplified in a variety of styles, and make interpretive decisions.

Songwriting & Production

Grades 10-12

1 credit

Prerequisite: Experience in any Guerin Catholic ensemble or music class

In this class, students will write, record, and produce original music individually and with their classmates. We will learn the basics of lyric writing and songwriting. We will use industry-standard technology to record, produce, and master our songs. Students should have basic knowledge of a chord-playing instrument (i.e. ukulele, guitar, piano), and should be willing to learn more chords as needed. This is an excellent class for students who have taken ukulele, guitar, or piano.

Advanced Elective Courses

House Band

Grades: 10-12

1-4 credits

Prerequisite: Application & interview process

Have you always wanted to take your musical skills and make them work in a band setting but have never had the time outside of school? House Band offers an opportunity for students who desire to improve their music skills and have camaraderie and companionship with other students in a musical setting. The course is offered but not limited to contemporary instruments i.e. piano, voice, guitar, bass guitar, drums or different percussion and wind instruments, and is intended for students with some musical experience. Students will work with the instructor individually and in a group setting to improve technique and musicianship. Students are required to participate in performance opportunities, outside of the school day, that support and extend learning in the classroom. Some performances may include concerts, and basketball games.

Saint Theodora's Jazz Orchestra

Grades 10-12

1-3 credits

Prerequisite: Experience in any Guerin Catholic ensemble or music class

A traditional "big band" and is open to students who play saxophone, trumpet, trombone, piano, bass, drums and guitar who have adequately developed technique on their instrument and are interested in performing jazz and popular music. The classes dig into many genres including swing, rock, funk, and latin styles. Literature for this ensemble will be selected from the standard "big band" and contemporary repertoire. Intervals, chord structure, chord progressions and improvisation will be studied. Students taking this course develop musicianship and specific performance skills through group and individual settings for the study and performance of the varied styles of instrumental jazz. The instruction includes the study of the history, formative, and stylistic elements of jazz. Students develop their creative skills through: (1) improvisation, (2) composition, (3) arranging, (4) performing, (5) listening, and (6) analyzing. Students are provided with opportunities to experience live performances by professionals during and outside of the school day. A limited amount of time outside of the school day may be scheduled for dress rehearsals and performances. In addition, a limited number of public performances

Grades 11-12 **2 credits**

Prerequisite: None

This course is multifaceted and gives students the opportunity to actively engage in theatre as creators, designers, directors, and performers. It emphasizes working both individually and collaboratively as part of an ensemble. The teacher's role is to create opportunities that allow students to explore, learn, discover, and collaborate to become autonomous, informed, and skilled theatre-makers. Students learn to apply research and theory to inform and to contextualize their work. Through researching, creating, preparing, presenting, and critically reflecting on theatre, they gain a richer understanding of themselves, their community, and the world. Students experience the course from contrasting artistic and cultural perspectives. They learn about theatre from around the world, the importance of making theatre with integrity, and the impact that theatre can have on the world. It enables them to discover and engage with different forms of theatre across time, place, and culture, promoting international-mindedness and an appreciation of the diversity of theatre.

Theatre Higher Level, International Baccalaureate

Grades 11-12 **4 credits**

Prerequisite: None

This course is multifaceted and gives students the opportunity to actively engage in theatre as creators, designers, directors, and performers. It emphasizes working both individually and collaboratively as part of an ensemble. The teacher's role is to create opportunities that allow students to explore, learn, discover, and collaborate to become autonomous, informed, and skilled theatre-makers. Students learn to apply research and theory to inform and to contextualize their work. Through researching, creating, preparing, presenting, and critically reflecting on theatre, they gain a richer understanding of themselves, their community, and the world. Students experience the course from contrasting artistic and cultural perspectives. They learn about theatre from around the world, the importance of making theatre with integrity, and the impact that theatre can have on the world. It enables them to discover and engage with different forms of theatre across time, place, and culture, promoting international-mindedness and an appreciation of the diversity of theatre. At the Higher Level, students will additionally research and examine the various contexts of at least one theatre theorist.

FINE ARTS - VISUAL

Elective Courses

Art History

Grades 10-12 **1 credit**

Prerequisite: None

Art History is a survey course that will cover artwork and artifacts of world cultures from prehistoric up through contemporary. Students taking Art History engage in learning experiences that encompass art history, art criticism, and aesthetics through lectures and debate. Through discussion and other activities, the class will analyze, interpret, theorize, and make informed judgments about artwork and the nature of art. There will also be a small amount of production where we will at times try out historically relevant studio techniques. Students will also be utilizing the resources of art museums, galleries, and studios.

Ceramics 1

Grades 10-12 **1 credit**

Prerequisite: Intro to 3D Art

Students taking Ceramics I engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality clay works of art. In addition to students experimenting with a wide range of ceramic techniques (which include pinch, slab, coil, drape mold, slip cast, and wheel projects), they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines.

Ceramics 2

Grades 10-12 **1 credit**

Prerequisite: Ceramics 1

Students taking Ceramics 2 engage in individualized learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality clay works of art. The class is very student-driven with students

choosing what type of projects they would like to do and proposing them to the teacher before production takes place while also making a ceramic tabletop and chess set. In addition to students experimenting with a wide range of ceramic techniques (which include slab, coil, drape mold, slip cast, and wheel projects), they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines.

Drawing 1

Grades 10-12

1 credit

Prerequisite: Intro to 2D Art

Students taking Drawing 1 engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality drawings. In addition to students experimenting with a wide range of drawing mediums (which include graphite, charcoal, ballpoint pen, pastel, oil pastel, and colored pencil) and techniques, they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines.

Drawing 2

Grades 10-12

1 credit

Prerequisite: Drawing 1

Students taking Drawing 2 engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality drawings. In addition to students experimenting with a wide range of drawing mediums (which include graphite, charcoal, pen, scratchboard, chalk pastel, oil pastel, colored pencil, and marker) and techniques, they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines.

Introduction to Two-Dimensional Art

Grades 9-12

1 credit

Prerequisite: None

Students taking Introduction to Two-Dimensional Art engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high quality drawn and painted works of art. In addition to students experimenting with a wide range of mediums, they will reflect upon the outcomes of those experiences, explore historical connections, find a direct correlation to other disciplines, and explore career options in visual art. Students will also explore additional materials and subject matter through a weekly sketchbook.

Introduction to Three-Dimensional Art

Grades 9-12

1 credit

Prerequisite: None

Students taking Introduction to Three-Dimensional Art engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality 3D works of art. In addition to students experimenting with a wide range of mediums, they will reflect upon the outcomes of those experiences, explore historical connections, find a direct correlation to other disciplines, and explore career options in visual art. Students will also explore additional materials and subject matter through a weekly sketchbook.

Painting 1

Grades 10-12

1 credit

Prerequisite: Intro to 2D Art

Students taking Painting 1 engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality paintings. In addition to students experimenting with a wide range of painting mediums (which include ink, watercolor pencils, acrylic, liquid watercolor, oil, spray paint, and mixed media) and techniques, they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines.

Painting 2

Grades 10-12

1 credit

Prerequisite: Painting 1

Students taking Painting 2 engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality paintings. In addition to students experimenting with a wide range of painting mediums (which include ink, watercolor pencils, acrylic, liquid watercolor, oil, spray paint, and mixed media) and techniques, they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines.

Photography

Grades 11-12

1 credit

Prerequisite: Intro to 2D Art

Please note: Student must provide their own DSLR camera to participate in this course.

Click-Click. Love to take photos? In this class, you will be learning the basics and the advanced nature of digital photography and how to manipulate your photographs in camera. Photo sessions will happen both in class and on location to get the best possible shots to take your photography to the next level. In class will be learning and using Adobe Photoshop to do post-photo session manipulation and will be using a professional photography standard digital printer to get the perfect printed portfolio quality work. Through both individual and class critique processes, you will also be reflecting upon and refining your work to create a professional online portfolio.

Sculpture 1

Grades 10-12

1 credit

Prerequisite: Intro to 3D Art

Students taking Sculpture 1 engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high quality realistic and abstract works. In addition to students experimenting with a wide range of subtractive and additive processes (which include carving, modeling, construction, and assembling methods), they will reflect upon the outcomes of those experiences, explore historical connections, and find a direct correlation to other disciplines. Students also use organizational principles and functions to solve specific visual problems and develop skills in applying media, techniques, and processes with sufficiency to communicate intended meaning.

Sculpture 2

Grades 10-12

1 credit

Prerequisite: Sculpture 1

Students taking Sculpture 2 engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high quality realistic and abstract works (some from life). The class is very student-driven with students choosing what type of projects they would like to do and propose them to the teacher before production takes place. In addition to students experimenting a wide range of subtractive and additive processes (which include carving, modeling, construction, and assembling methods), they will reflect upon the outcomes of those experiences, explore historical connections, and find direct correlation to other disciplines. Students also use organizational principles and functions to solve specific visual problems and develop skills in applying media, techniques, and processes with sufficiency to communicate intended meaning.

Stained Glass 1

Grades 10-12

1 credit

Prerequisite: Intro to 2D or 3D Art

Students taking Stained Glass will engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality 3D glass works of art. In addition to students experimenting with a wide range of techniques, they will reflect upon the outcomes of those experiences, explore historical connections, find direct correlation to other disciplines and our faith, and explore career options in visual art. Students will utilize the resources of Kokomo Opalescent Glass, various Catholic churches, art museums, and introduction to art-related careers.

Stained Glass 2

Grades 10-12

1 credit

Prerequisite: Stained Glass 1

Students taking Stained Glass 2 will engage in sequential learning experiences that encompass art history, art criticism, aesthetics, and art production that lead to the creation of high-quality 3D glass works of art (some from life). The class is more student-driven, expressive, and self-reflective than Stained Glass 1. In addition to students experimenting with a wide

range of techniques, they will reflect upon the outcomes of those experiences, explore historical connections, find direct correlation to other disciplines and our faith, and explore career options in visual art. Students will utilize the resources of Kokomo Opalescent Glass, various Catholic churches, art museums, and an introduction to art-related careers.

Visual Arts Standard Level, International Baccalaureate

Grades 11-12 **2 credits**

Prerequisite: Intro to 2D or 3D Art

Visual Arts Standard Level is a course designed by the International Baccalaureate Organization. This class is suitable for students who are eager to explore and develop their own creative potential through any of the main media techniques of the visual arts. The main prerequisites for this course are enthusiasm, commitment, and a willingness to become involved in practical and theoretical inquiry into aspects of the visual arts. The studio course will include opportunities for structured learning and personal research of a more experimental nature; many art techniques and media will be used for at least two of the three art making forms: two-dimensional, three-dimensional, and digital media. Students are required to document their work to encourage adventurous and critical personal investigation in a working journal, containing both visual and verbal information, including records of exhibitions visited, consideration of the visual arts of other cultures, the historical context of artworks being studied, and references to the student's own studio practice. Students will also set-up and exhibit their own artwork at the end of the two trimesters. At the standard level, students will have three areas of study - 20% comparative study, 40% process portfolio, and 40% exhibition/project based work.

Visual Arts Higher Level, International Baccalaureate

Grades 11-12 **4 credits**

Prerequisite: Intro to 2D or 3D Art

Visual Arts Higher Level is a course designed by the International Baccalaureate Organization. This class is suitable for students who are eager to explore and develop their own creative potential through any of the main media techniques of the visual arts. The main prerequisites for this course are enthusiasm, commitment, and a willingness to become involved in practical and theoretical inquiry into aspects of the visual arts. The studio course will include opportunities for structured learning and personal research of a more experimental nature; many art techniques and media will be used for all three art making forms: two-dimensional, three-dimensional, and digital media. Students are required to document their work to encourage adventurous and critical personal investigation in a working journal, containing both visual and verbal information, including records of exhibitions visited, consideration of the visual arts of other cultures, the historical context of artworks being studied, and references to the student's own studio practice. Students will also set-up and exhibit their own artwork at the end of the four trimesters. At the higher level, students will have three areas of study - 20% comparative study, 40% process portfolio, and 40% exhibition/project based work.

HEALTH AND PHYSICAL EDUCATION (KINESIOLOGY)

Required Courses

Kinesiology 1 **Trimester 1**

Grade 9 **1 credit**

Prerequisite: None

Also offered as a blended Summer School course to incoming freshmen or those needing credit recovery.

This course focuses on the influence of the physical, emotional, mental, moral, social, and spiritual dimensions of health knowledge, attitudes, and behaviors. This course continues the emphasis on health-related fitness and developing the skills and habits necessary for a lifetime of physical activity. The Kinesiology program includes skill development and the application of rules and strategies of complex difficulty in at least three of the following different movement forms: five components of fitness (cardio-respiratory endurance, muscular strength, muscular endurance, flexibility and body composition); aerobic exercise and anaerobic exercise; team sports; individual/dual sports; outdoor pursuits; gymnastics; self-defense; and recreational games. Assessment includes both written and performance-based evaluations.

Kinesiology 2 **Trimester 2**

Grades 9-10 **1 credit**

Prerequisite: Kinesiology 1

This course focuses on the influence of the physical, emotional, mental, moral, social, and spiritual dimensions of health knowledge, attitudes, and behaviors. High School health education provides the basis for continued methods of developing knowledge, concepts, skills, behaviors, and attitudes related to student health and well-being. This course includes the major content areas in a planned, sequential, comprehensive health education curriculum as expressed in the Indiana Health Education Proficiency Guide: growth and development; mental and emotional health; community and environmental health; nutrition; family life education; consumer health; personal health; alcohol, tobacco and other drugs education; intentional and unintentional injury; and health promotion and disease prevention. Students are provided with opportunities to explore the effect of health behaviors on an individual's quality of life. This course assists students in understanding that health is a lifetime commitment by analyzing individual risk factors and health decisions that promote health and prevent disease. Students are also encouraged to assume individual responsibility for becoming competent health consumers. Assessment includes both written and performance-based evaluations. A variety of instructional strategies, including technology, are used to further develop health literacy.

Kinesiology 3

Grades 9-10

Trimester 3

1 credit

Prerequisite: Kinesiology 1 & 2

This course focuses on the influence of the physical, emotional, mental, moral, social, and spiritual dimensions of health knowledge, attitudes, and behaviors. This course also emphasizes a personal commitment to lifetime physical activity and fitness for enjoyment, challenge, self-expression, social interaction and lifelong well-being. It provides students with opportunities to achieve and maintain a health-enhancing level of physical fitness and increases their knowledge of fitness concepts. It includes three different movement forms without repeating those offered in Kinesiology I and II. Movement forms will include: five components of physical fitness (cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition); aerobic and anaerobic exercise; team sports; individual/dual sports; gymnastics; outdoor pursuits; self-defense; and recreational sports. Assessment includes both written and performance-based evaluations. Kinesiology III will also include a discussion of related careers.

Elective Courses

Current Health Issues

Grades 11-12

1 credit

Prerequisite: Kinesiology 1, 2, 3 or Department recommendation

This course focuses on the influence of the physical, emotional, mental, moral, social, and spiritual dimensions of health knowledge, attitudes, and behaviors. This course will focus on specific health issues and/or emerging trends in health and wellness, but not limited to: personal health and wellness; non-communicable and communicable diseases; nutrition; mental and emotional health; tobacco-prevention; alcohol and other drug prevention; human development and family health; health care and/or medical treatments; and national and/or international health issues. This course provides students with the knowledge and skills of health and wellness core concepts, analyzing influences, accessing information, interpersonal communication, decision-making and goal-setting skills, health-enhancing behaviors, and health and wellness advocacy skills. Assessment includes both written and performance-based evaluations.

Fitness and Recreation

Grades 10-12

1 credit

Prerequisite: Kinesiology 1, 2, 3 or Department recommendation

This course is designed for any student who is interested in participating in daily physical activity in a fun, non-threatening environment. All aspects of the six components of health (physical, emotional, mental, environment, spiritual and social) will be incorporated into the course; however, the primary focus will be on the physical and social dimensions of wellness. The course will include the study of physical developmental concepts and principles of sport and exercise as well as opportunities to develop or refine skills and attitudes that promote lifelong fitness.

Strength and Conditioning

Grades 9-12

1 credit

Prerequisite: Kinesiology 1, 2 or Department recommendation; IHSAA athletic physical on file with athletic department

Note: May be taken 1x freshman year, 2x sophomore, junior, senior year

This course promotes lifetime sport and recreational activities while providing an opportunity for an in-depth study in specific areas. The following activities will be included: five components of fitness; team sports; individual/dual sports; performance testing; cross-training; speed enhancement; power development; plyometric training; weight/Olympic lifting; and recovery practices. It includes the study of physical developmental concepts and principles of sport and exercise as well as opportunities to develop or refine skills and attitudes that promote lifelong fitness. Students will be given the opportunity to design and develop an appropriate personal fitness program that enables them to achieve a desired fitness goal. Assessment will include both written and performance-based evaluations.

LANGUAGE ARTS

Required Courses

English 9

Grade 9

2 credits

Prerequisite: None

English 9 places emphasis on four major areas: reading comprehension, written composition, English language conventions, and vocabulary. Students will read and analyze many different genres including short stories, novels, poetry, non-fiction excerpts, and a drama. They will develop critical thinking skills by examining the plots, themes, and other literary conventions included in the literature they read. Vocabulary lessons are interwoven throughout the course. Students will write compositions for different purposes and audiences, and a three to four page research paper while utilizing all of the 6+1 writing traits. The English language conventions used in the composition component of the class will also be used for improving their oral communication skills.

English 9 (Honors)

Grade 9

2 credits

Prerequisite: School counselor approval

Honors English 9 places emphasis on four major areas: reading comprehension, written composition, English language conventions, and vocabulary. Students will participate in challenging in-depth analysis of the various genres including short stories, novels, graphic novels, poetry, non-fiction excerpts with additional vocabulary lessons, and dramas. They will develop critical thinking skills by examining the plots, themes, and other literary conventions included in the literature they read. Literature Circles will provide the students an opportunity to learn a literature classic in a small group environment, and vocabulary lessons are interwoven throughout the entire course. Students will write compositions for different purposes and audiences, and a three to four page research paper while utilizing all of the 6+1 writing traits. The English language conventions used in the composition component of the class will also be used for improving their oral communication skills. The honors section primarily reads the same texts as the academic section (with a few exceptions), but there are some significant differences between the two levels. The honors students are expected to have more independence with the reading, and the pace of the lessons is somewhat faster. Class discussions and writing assignments also involve greater analytical depth at the honors level. These differences prepare students for advanced literature courses at the upper levels.

English 10

Grade 10

2 credits

Prerequisite: English 9

English 10 builds upon skills acquired and practiced in English 9. Students will continue to work on analyzing literature, writing compositions, mastering oral communication skills, deploying Standardized English conventions, and developing vocabulary. The literature units invite students to examine poetry, short stories, personal essays, novels, and drama. Composition units require students to refine their writing process as they plan, draft, and revise narrative, expository, and persuasive compositions, including a literary analysis and a research paper. Students practice oral communication skills through informal discussions and formal presentations (narrative, expository, and persuasive). Grammar units review conventions so that students avoid or remedy common errors. Vocabulary units require students to consider word origins and the differences between a text's literal and implied meanings.

English 10 (Honors)

Grade 10**2 credits****Prerequisite: English 9 or teacher recommendation**

Students enrolled in Honors English 10 will develop all areas mentioned in English 10. In addition, students will read, write, and research more extensively to hone their critical thinking skills. This course incorporates the reading and writing skills in conjunction with research and speaking skills to allow the students to bring together their language arts abilities for more complex assessments.

Language A: Literature, Standard Level, International Baccalaureate**Grades 11-12 4 credits****Prerequisite: English 10 (Honors) or Teacher Recommendation**

English A: Literature, Standard Level, is a course based on the content established by the International Baccalaureate Organization. This course is organized into three areas of exploration and seven central concepts and focuses on the study of literary works. Together, the three areas of exploration (“readers, writers, texts,” “time and space,” “intertextuality: connecting texts”) of the course add up to a comprehensive exploration of literature from a variety of cultures, literary forms, and time periods. Students learn to appreciate the artistry of literature and develop the ability to reflect critically on their reading, presenting literary analysis powerfully through both oral and written communication. Students develop the ability to engage in close, detailed analysis of literary works, building understanding of the techniques involved in literary criticism. The study of literary works in context is emphasized, and through the study of literature in translation the student is challenged to reflect on the role of cultural assumptions in interpretation. For all of the works covered, global issues will be discussed and analyzed for connections. There are three required IB assessments that are evaluated (internally and externally) in order to figure the student’s IB grade. The Individual Oral assessment is given at the very beginning of the second trimester. The student will give an oral presentation for the prompt, “Examine the ways in which the global issue of your choice is presented through the content and form of two of the works that you have studied” which is supported by an extract from a work originally written in English and one from a work studied in translation. The Paper-I assessment will be given in May and consists of two passages (previously unseen) from two literary forms, each accompanied by a guiding question. Students choose one passage to analyze. The Paper-II assessment will be given in May and consists of four questions (previously unseen). In response to one question, students will write a comparative essay based on two works studied. Different works must be chosen for each of the three IB assessments.

Language A: Literature, Higher Level, International Baccalaureate**Grades 11-12 4 credits****Prerequisite: Honors English 10 or teacher recommendation**

English A: Literature, Higher Level, is a course based on the content established by the International Baccalaureate Organization. Students enrolled in IB English: Literature will develop their powers of expression in both oral and written communication by using the skills involved in writing and speaking in a variety of styles and situations. Works studied are chosen from a broad list of prescribed authors and works representing different literary periods and genres. The course is assessed through both oral and written examinations that allow students to demonstrate individual language skills, the ability to critically analyze and comment upon familiar and unfamiliar texts, and the ability to express a personal and independent response to literature. Literature studied for IB English 11 covers fiction (general and historical) and drama (translated from original language to English) with a world-literature emphasis in trimester two. Literature studied for IB English 12 encompasses drama, poetry, memoir, and fiction. Required IB Higher Level assessments include the following: Written Assignment at the junior level, Individual Oral Commentary and Discussion at the senior level, and IB Higher Level tests--Paper I and Paper II--in May of senior year.

Elective Courses**Biblical Literature****Grades 11-12****1 credit****Prerequisite: None**

Biblical Literature, a course based on the Indiana Academic Standards for English/Language Arts, is a study of the Bible, viewed from a literary standpoint, as a source of a wide variety of literary patterns, and themes. Students examine the different books in relation to the various historical time frames of the books and in relation to related literature as it pertains

to Biblical themes. Students read, discuss, and write about Biblical references in both classical and modern literature, formation of a canonical Bible, inclusion of apocryphal and heretical writings, oral versus literate transmission of sacred history and doctrine, and questions and problems of interpretation.

Composition

Grades 10-12 **1 credit**

Prerequisite: None

Composition provides students with an opportunity to learn to write by writing. Students will have frequent opportunities to write for different audiences and purposes, using a process that includes: prewriting, drafting, peer sharing, revising (content, structure, or presentation), editing (grammar, punctuation, spelling, usage), and producing a final product. For peer sharing, students receive specific training in providing constructive, substantive feedback, while role playing as members of the author's target audience. Selected readings provide models of effective writing techniques and opportunities to evaluate and discuss the writings of others. In addition to providing instruction in writing clear, coherent, and organized text, this course will teach strategies for collecting and transforming data for use in writing and using criteria to evaluate and revise writing. Instruction in grammar, usage, and mechanics will be integrated with writing so that students develop a functional understanding of language and a common vocabulary for discussing writing. Though not every piece of writing has to be put into final form, those that are should follow accepted conventions of language, style, mechanics, and format.

Creative Writing

Grade 10-12 **1 credit**

Prerequisite: None

Creative Writing provides students with ample opportunities to combine literary creativity with the discipline of written discourse. The concept of the manipulation of language to convey ideas, feelings, moods, and visual images should be the basis of the course. Students become familiar with standard literary elements through the reading and study of published prose and poetry and are taught to use those elements in their own writing. Additionally, students learn strategies for evaluating and responding to their own writing and the writing of others in a peer-sharing component. In this peer-sharing component, students receive specific training in providing constructive, substantive feedback. Representative models of literary excellence will also be studied.

Etymology

Grades 10-12 **1 credit**

Prerequisite: None

Etymology provides instruction in the derivation of English words and word families from their Latin and Greek roots. It also provides a study of the connotative and denotative meaning of words in a variety of contexts. Students study the origins and meanings of English words, including roots, prefixes, suffixes, and reasons for language change. This course introduces students to tools and resources for etymological study and encourages them to be curious about the English language.

Journalism

Grades 10-12 **1 credit**

Prerequisite: None

Journalism is a study of news elements, journalism history, First Amendment law, ethics, fact and opinion, copy editing, news, and features as they apply to print and digital media products. It includes a comparison study of journalistic writing to other types of English writing with practical application of news, features, editorials, reviews, columns and digital media writing forms. For the second credit: Students continue to develop journalistic writing skills in addition to studying graphic design, advertising, public relations, photojournalism and emerging media development and design.

Mass Media

Grades 10-12 **1 credit**

Prerequisite: Digital Applications & Responsibility

Mass Media provides a study of television, film, newspaper, radio, and videotape as sources of information, persuasion, and creative expression. This course helps students develop an awareness of audience and purpose in evaluating mass media, as well as in producing their own media productions. It should also help students to judge media critically and understand the use of persuasive language and strategies. Opportunities are provided for students to generate material for mass media.

Speech**Grades 10-12****1 credit****Prerequisite: None**

Speech provides the study of and practice in the basic principles and techniques of effective oral communication. This course includes instruction in adapting speech to different audiences and purposes. Students have an opportunity to make different types of oral presentations and use research and technology to carefully organize and prepare. They deliver focused and coherent speeches that convey clear messages, using gestures, tone, and vocabulary appropriate to the audience and purpose. Students also practice and develop critical listening skills.

MATHEMATICS

Algebra 1**Grade 9****2 credits****Prerequisite: None**

In Algebra 1, the use of variables in developing techniques and strategies for solving problems is established. Solving equations with one variable and systems of equations with two or more variables is an important component. Solving inequalities in one or two variables is also featured. Emphasis is placed on operations with polynomials, factoring, and manipulation of algebraic fractions and fractional equations. The Cartesian coordinate system is revisited to graph linear equations and inequalities. Quadratic equations are solved by graphing, completing the square, and the quadratic formula. The course concludes learning statistics.

Algebra 1 (Honors)**Grade 9****2 credits****Prerequisite: School counselor approval**

Honors Algebra 1 students are expected to master the same standards of Algebra I (Academic) with greater emphasis placed in such topics as transforming formulas, factoring polynomials, choosing mathematical models, and inverse variations. Additional assigned practice in these areas prepares the honors student for future honors classes and more difficult assessment instruments.

Algebra 2**Grades 10-12****2 credits****Prerequisite: Algebra 1 and Geometry**

Algebra 2 extends the many concepts mastered in Algebra 1 including linear, absolute value, quadratic, polynomial, radical, rational, exponential and logarithmic function families and their transformations. Solving systems of equations are extended to three-variable systems. Laws of exponents and radicals are extended through the introduction of rational exponents and complex numbers. Students will investigate arithmetic and geometric sequences, series, probability and statistics

Algebra 2 (Honors)**Grades 9-12****2 credits****Prerequisite: Algebra 1 and Geometry**

Algebra 2 Honors covers the same topics described above in more depth. At the Honors level, more emphasis is placed on answering the “why” and “how” questions that lead to a deeper understanding of the fundamentals of mathematics. Students at this level are expected to identify patterns and make predictions about the behavior of algebraic functions, and to develop and express an understanding of the subject matter that allows them to make judgments about the validity of mathematical propositions.

Finite Mathematics**Grade 10-12****1 credit****Prerequisite: Algebra 2**

Discrete Mathematics is an umbrella of mathematical topics. It is a course designed for students who will undertake higher-level mathematics in college that may not include calculus. It is a practical math course with many hands-on labs and activities. Topics include matrices, recursion, graph theory, social choice, and game theory. Technology, such as computers and graphing calculators, is required.

Finite Mathematics (Honors)**Grade 10-12****1 credit****Prerequisite: Algebra 2**

Discrete Mathematics is an umbrella of mathematical topics. It is a course designed for students who will undertake higher-level mathematics in college that may not include calculus. Finite Honors will dig deeper into the many topics relevant to this field of math, such as matrices, recursion, graph theory, social choice, and game theory. Technology, such as computers and graphing calculators, is required.

Geometry**Grades 10-11****2 credits****Prerequisite: Algebra 1**

Euclidean geometry involves the development of a logical, deductive system through establishment of rules of argument, definitions, postulates, and theorems. The concept of deductive proof is introduced early in the course and is fully developed as the course progresses. Topics include congruent and similar figures, perpendicular and parallel lines, polygons (with an emphasis on triangles and quadrilaterals), circles, areas, and volumes. The main emphasis of the course is on plane geometry, but some aspects of solid geometry are included. Throughout the course, algebra is used extensively to solve geometric problems.

Geometry (Honors)**Grades 9-11****2 credits****Prerequisite: Algebra 1 and School counselor approval**

Honors Geometry students will master the same standards of Geometry as the academic level of the course while studying some concepts in more depth. Some of these additional challenge problems are using trigonometry to find area of polygons, finding the distance from a point to a diagonal line, and completing more formal proofs of geometric relationships. Honors students must demonstrate their grasp of the topics on more difficult assessment instruments that differentiate the two levels.

Mathematics Standard Level, International Baccalaureate**Grades 11-12****2-4 credits****Prerequisite: Algebra 2**

Mathematics Standard Level provides students who will continue to study mathematics at the university level with a background of mathematical thought and a functional level of technical ability. The use of graphing technology is required. Students must complete study in the following core topics: algebra; functions and equations; circular functions in trigonometry; vectors; statistics and probability; calculus; functions, graphs and limits; derivatives; and integrals. Each student must submit an investigation paper and a modeling project comprising 20% of the IB assessment.

Mathematics Higher Level, International Baccalaureate**Grades 11-12****4 Credits****Prerequisite: Algebra 1, Geometry, Algebra 2, Trigonometry (H) (teacher recommendation only)**

Mathematics Higher Level caters to students with a good background in mathematics who are competent in a range of analytical and technical skills. The majority of these students will be expecting to include mathematics as a major component of their university studies, either as a subject in its own right or within courses such as physics, engineering, and technology. Others may take this subject because they have a strong interest in mathematics and enjoy meeting its challenges and engaging with its problems. In addition to the deeper investigation of the core topics covered in SL, HL will include topics in series and differential equations.

Pre-Calculus/Trigonometry**Grades 11-12****2 credits****Prerequisite: Algebra 2**

Pre-Calculus covers a variety of advanced mathematical topics. Concepts introduced in Algebra 2 are reinforced and extended. The course studies trigonometry and its many applications. Other topics studied include analytic geometry, vectors, matrices, sequences and series, logarithms and exponents, complex numbers, probability, and mathematical induction. Emphasis is on problem-solving techniques, relationships between mathematics, and other fields of study. Graphing calculators and computer software are used extensively.

Cadet Teaching Experience

Grades 11-12 **2-4 credits**

Prerequisite: Application process, personal transportation

Please note: Student must be available 4th and 5th period combined and use two elective credits

This elective course provides students in grades eleven (11) or twelve (12) organized exploratory teaching experiences in grades kindergarten (K) through grade eight (8). All teaching experiences should be preplanned by the high school Cadet Teaching Experience teacher-trainer and the cooperating teacher(s) who are interested in supervising prospective teachers and providing them with pre-training experiences in one or more classes. This course provides a balance of class work relating to classroom organization, classroom management, the curriculum and instructional process, observations of teaching, and instructional experiences. Study topics and background reading provide cadets information concerning the teaching profession and the nature of the cadet teachers' assignments. Evaluation is based upon the cadet teachers' cooperation, day-to-day practical performance, and classwork including the cadets' potential ability to teach. The total workload of the Cadet Teaching course is comparable to those for other subjects in the high school curriculum.

Career Exploration Internship

Grades 11-12 **2-4 credits**

Prerequisite: Application process, personal transportation

Please note: Student must be available 4th and 5th period combined and use two elective credits

The *Career Exploration Internship* course is a paid or unpaid work experience in the public or private sector that provides for workplace learning in an area of student career interest. Unlike a cooperative education program in which students gain expertise in a specific occupation, the career exploration internship is intended to expose students to broad aspects of a particular industry or career cluster area by rotating through a variety of work sites or departments. In addition to their workplace learning activities, students participate in 1) regularly scheduled meetings with their classroom teacher, or 2) a regularly scheduled seminar with the teacher for the purpose of helping students make the connection between academic learning and their work-related experiences. Specific instructional standards tied to the career cluster or pathway and learning objectives for the internship must be written to clarify the expectations of all parties – the student, parent, employer, and instructor.

College-Entrance Preparation

Grades 10-12 **1 credit**

Prerequisite: Completion or concurrent enrollment with Algebra 2

College-Entrance Preparation utilizes individual student score reports from the PSAT, ASPIRE and ACT to prepare students for the SAT, ACT and other college-based placement tests. Based on student score reports, students will receive targeted instruction to strengthen their foundations in critical reading, writing, mathematics, and science sections of college admission and placement exams. The course will encompass test-taking strategies to prepare students for success on a high-stakes assessment. Teachers are encouraged to use a curriculum with longitudinal, successful results.

Farming and Food Justice

Grade 10-12 **1 credit**

Prerequisite: None

Farming and Food Justice is a practicum-based course for Guerin Catholic's school farm, which invites students and the community into ecological education, sustainable food systems, and food justice. Students can expect to do hands-on farm work while learning the theological, ecological, scientific, and business basics that underlie running a small vegetable farm. The course will emphasize Christian teachings like care for creation, preferential option for the poor and vulnerable, solidarity, and the dignity of human work. Most class periods will be spent outside on the Farm in nature's classroom, working in the soil and growing delicious food.

SCIENCE

Required Courses

Biology 1

Grade 9 **2 credits**

Prerequisite: None

Biology I is an introductory science course emphasizing terminology, the major groups of organisms, homeostasis, biochemistry/nutrition, cells, genetics, ecology, and evolution. Time is dedicated to helping students think independently and scientifically and to developing successful study skills. Special emphasis is placed on making material covered relate to our everyday existence through lab activities, uses of technology, and various projects throughout the course.

Biology 1 (Honors)

Grade 9 **2 credits**

Prerequisite: School counselor approval

Biology I is an introductory science course emphasizing terminology, the major groups of organisms, homeostasis, biochemistry/nutrition, cells, genetics, ecology, and evolution. Time is dedicated to helping students think independently and scientifically and to developing successful study skills. Special emphasis is placed on making material covered relate to our everyday existence through lab activities, uses of technology, and various projects throughout the course. Students will be expected to learn material in greater depth and be able to work independently and in small groups to complete labs. This class is intended as the track for those students considering IB Biology or other Honors Science Courses.

Biology Standard Level, International Baccalaureate

Grades 12 **3 credits**

Prerequisite: Biology 1, Chemistry 1, and Physics 1

Biology Standard Level is a life science course established by the International Baccalaureate Organization. In Diploma Programme biology, it is hoped that students will acquire a body of facts and at the same time develop a broad, general understanding of the principles of the subject. There are four basic biological concepts that run throughout the course: structure and function; universality versus diversity; and equilibrium within systems. Students also study cells, the chemistry of life, genetics, ecology, evolution, human health, and physiology as well as additional IB topics as determined by the instructor.

Biology Higher Level, International Baccalaureate

Grades 11-12 **4 credits**

Prerequisite: Prerequisite: Biology 1, Chemistry 1, Physics 1 (Required grades: a B- or above in each honors science course OR an A in each academic course)

This is an advanced course in biology that is similar in breadth and depth to a first-year college biology class. In addition to the standard level topics, higher-level students must complete study in the following topics: nucleic acids and proteins; cell respiration and photosynthesis; human reproduction; defense against infectious diseases; nerves, muscles and movement; excretion; plant science as well as additional IB topics as determined by the instructor.

Chemistry I

Grades 10-11 **2 credits**

Prerequisite: Biology 1 and Algebra 1

Chemistry I is a comprehensive introductory course that will help students develop a better understanding of their physical world. Students are expected and encouraged to develop critical, independent thinking skills, use technology to gather and organize data, and work collaboratively in groups. We use a modeling curriculum that follows the history of the development of the atom. Our study of chemistry will begin with the macroscopic and visible aspects of the discipline and proceed throughout the course to the atomic level. Topics covered include basic lab skills and data presentation, kinetic molecular theory and gas laws, chemical formulas and reactions, the mole concept, and multiple applications of stoichiometry. Additional topics such as periodic trends, acid-base theory, and equilibrium will be added as time permits.

Chemistry 1 (Honors)

Grade 10 **2 credits**

Prerequisite: Teacher recommendation

Chemistry 1 (Honors) covers the same content as Chemistry I (Academic) but students will be challenged to work more independently. The rigor of coursework, lab analysis and exams is greater. The level of expectation for problem solving will

Grade 12 **1 credit**

Prerequisite: Biology 1, Chemistry 1

Anatomy & Physiology is an advanced Science elective course in which students investigate and apply concepts associated with Human Anatomy and Physiology. Concepts covered include the structure and function of the various tissues, organs and organ systems of the human body. Emphasis will be on the Gross & Microscopic Anatomy as well as the normal Physiological processes of the organ systems. Some Pathophysiology will be included to help reinforce an understanding of normal function vs common disease states in the organ systems of the body. Laboratory experiences will be used to apply knowledge of various course topics. This course will help to prepare students planning to pursue a career in the medical field.

Biology 2 (Honors)

Grade 12 **1 credit**

Prerequisite: Biology 1, Chemistry 1

Biology 2 is an advanced laboratory, field, and literature investigations-based course. Students enrolled in Biology 2 examine in greater depth the structures, functions, and processes of living organisms. Students also analyze and describe the relationship of Earth's living organisms to each other and to the environment in which they live. In this course, students refine their scientific inquiry skills as they collaboratively and independently apply their knowledge of the unifying themes of biology to biological questions, and problems related to personal and community issues in the life sciences. This course is an introduction for IB Biology Standard Level.

Chemistry 2 (Honors)

Grade 12 **1 credit**

Prerequisite: Biology 1, Chemistry 1, and Algebra 2 (may be taken concurrently with this course)

Chemistry 2 is an extended laboratory, field, and literature investigations-based course. Students enrolled in Chemistry 2 examine the chemical reactions of matter in living and nonliving materials. Based on the unifying themes of chemistry and the application of physical and mathematical models of the interactions of matter, students use the methods of scientific inquiry to answer chemical questions and solve problems concerning personal needs and community issues related to chemistry. This course is an introduction to IB Chemistry Standard Level.

Environmental Science (Honors)

Grade 12 **2 credits**

Prerequisite: None

Environmental Science is an interdisciplinary course that integrates biology, earth science, chemistry, physics and social studies. Many key concepts from previous science courses are reinforced and applied to the study of environmental systems. A goal of the course is for students to develop a stronger appreciation for the environment and an awareness of the role humans have in it. Good stewardship of resources is emphasized throughout the course. Topics studied include ecological systems, resource use, energy, pollution, climate change, biodiversity, conservation and sustainability. Students will also further their development in laboratory skills such as measuring, predicting, collecting data, and analyzing data.

Physics 2 (Engineering) (Honors)

Grade 12 **1 credit**

Prerequisite: B+ or above Honors Physics OR Physics teacher recommendation

Students enrolled in Physics 2 significantly expand upon the physical models they developed in Physics 1. They investigate physical phenomena and develop empirical and theoretical models that are useful in understanding the interacting systems of the macro- and microcosms. Students extensively explore the unifying themes of physics in the laboratory and as they tackle challenging engineering problems. Core physics topics include advanced kinematics, dynamics, and electromagnetism. Aerospace, electrical, and mechanical applications are addressed as the students tackle challenging engineering problems and projects.

SOCIAL STUDIES

Required Courses

Economics

Grade 10 **1 credit**

Prerequisite: None

Also offered as an online Summer School course for sophomores or those needing credit recovery.

Economics includes a study of the allocation of scarce resources and their alternative uses for satisfying human wants. This course examines basic models of decision making at various levels and in different areas including: decisions made as a consumer, producer, saver, investor, and voter; business decisions to maximize profits; public policy decisions in specific markets dealing with output and prices in the national economy; and problems developing nations face.

Economics (Honors)

Grade 10 **1 credit**

Prerequisite: Teacher recommendation

Also offered as an online Summer School course for sophomores or those needing credit recovery.

Economics (H) includes an analysis of international trade, supply and demand, market structures, government policy, money and banking, and economic performance. Students are exposed to a critique of the arguments against globalization, and study the benefits of international trade. Honors students learn the arguments for and against free trade. Students read the book, *The Travels of a T-Shirt in the Global Economy*, which provides an excellent practical exposition of economic principles as they relate to the travels of one product through the different stages of production. The book ties together the concepts of market structures, supply and demand, international trade, and government policies. Students are exposed to an in-depth analysis of market structures. Honors students learn the benefits of competitive markets, and the reasons the government regulates industries to maintain competitiveness. Finally, the students engage in a critical analysis of government policies to deal with economic instability.

History Higher Level, International Baccalaureate

Grades 11-12 **4 credits**

Prerequisite: Teacher recommendation

IB History is a course in which the students explore topics in the history of the United States and Latin America as well as a series of topics in 20th century world history while considering questions of historiography and conducting in-depth research. The goals of this course are to help the IB student of history develop a sense of internationalism; understand the discipline of history; fulfill World Civilization and U.S. History requirements of the State of Indiana; prepare for the successful completion of exams at the end of senior year; and conduct a historical investigation. Americas topics include the U.S. Civil War, the development of modern nations (1865-1929), and the emergence of the Americas in global affairs (1880-1929). 20th century topics include: World War I in Europe, the interwar years, World War II, the rise and rule of 20th century dictators, and the Cold War, including the Korea/Vietnam conflicts.

History Standard Level, International Baccalaureate

Grades 11-12 **4 credits**

Prerequisite: Teacher recommendation

IB History is a course in which the students explore topics in the history of the United States and Latin America as well as a series of topics in 20th century world history while considering questions of historiography and conducting in-depth research. The goals of this course are to help the IB student of history develop a sense of internationalism; understand the discipline of history; fulfill World Civilization and U.S. History requirements of the State of Indiana; prepare for the successful completion of exams at the end of senior year; and conduct a historical investigation.

U.S. topics include the colonial period; movements of independence; evolution of new governments; Indiana history; the opening of the West and manifest destiny; the United States Civil War, causes, courses and effects; immigration and urbanization, U.S. foreign policy in the late 19th/early 20th century; and the Gilded Age and Progressive Era. Topics of the 20th century include: World War I in Europe, the interwar years, World War II, the rise and rule of 20th century dictators, and the Cold War, including the Korea/Vietnam conflicts.

Modern World Civilization

Grade 12 **2 credits**

Prerequisite: None

Modern World Civilization provides an in-depth look at key 20th century world events. The course focuses on major world wars, dictators, the Cold War, and modern American topics. In particular, the course examines: World Wars I

and II; the Russian Revolution, Lenin and Stalin; the Great Depression; the interwar dictatorships of Mussolini and Hitler; the early Cold War in the US; Korean and Vietnam Wars; American social movements of the 1960s; foreign policy in the later years of the Cold War; and the fall of Communism. Students will read the historical novel, *In Harm's Way*, learning about the *USS Indianapolis*. The course is designed to study and identify themes throughout history that still apply to the modern world today, so students compare current events to topics we have studied.

United States Government

Grade 10 **1 credit**

Prerequisite: None

Also offered as an online Summer School course for sophomores or those needing credit recovery.

United States Government provides a framework for understanding the nature and importance of responsible civic participation and for learning the rights and responsibilities of individuals in a constitutional democracy. The course enables students to explore the historic origins and evolution of political philosophies into contemporary political and legal systems. Constitutional structure and processes of the legislative, executive, and judicial branches of the national, state, and local levels of government are examined. Students learn to demonstrate an understanding of the governmental structures of the United States and other political systems, as well as the relationship of American government to world affairs. They learn to understand their ability to influence policies and decisions as individuals and in groups. Related learning experiences in the school and community enable students to learn how to participate effectively in the political process. The study of the United States government also offers students opportunities to develop knowledge, inquiry skills and the means to preserve and improve our constitutional democracy.

United States Government (Honors)

Grade 10 **1 credit**

Prerequisite: Teacher recommendation

Also offered as an online Summer School course for sophomores or those needing credit recovery.

The honors curriculum for the United States Government includes all of the above plus additional document-based assignments and essay writing. The honors curriculum includes the completion of a trimester project in order to begin preparing students considering the IB program.

United States History

Grade 11 **2 credits**

Prerequisite: None

United States History at the academic level is a two-trimester course in which students explore topics in the history of the United States and Indiana while concentrating on developing the skills of historical inquiry and writing. The goals of this course are to help the student of history to understand the discipline of history and fulfill U.S. History requirements of the State of Indiana. Topics include the colonial period; movements of independence; evolution of new governments; Indiana history; the opening of the West and manifest destiny; the United States Civil War, causes, courses and effects; immigration and urbanization, U.S. foreign policy in the late 19th/early 20th century; and the Gilded Age and Progressive Era.

Elective Courses

Criminal Justice

Grades 10-12 **1 credit**

Prerequisite: U.S. Government (recommended)

Criminal Justice provides an opportunity for students to get a survey of the US criminal justice system. Topics will include crime in America, law enforcement, criminal evidence and court procedure, careers in law enforcement, as well as the corrections system. This course will also examine the constitutional protections of the accused, Catholic perspectives on crime and criminal justice, such as the death penalty and “right to die” life end decisions. Students will also study criminal cases and current event topics.

Ethnic Studies (online course through Indiana Online Academy)

Grades 10-12 **1 credit**

Prerequisite: None

Note: This course may be taken through Indiana Online Academy as an additional course for one trimester, giving students a six-course workload instead of five. The cost of course enrollment is determined by the Indiana Online Academy.

Ethnic Studies provides opportunities to broaden students' perspectives concerning lifestyles and cultural patterns of ethnic groups in the United States. This course will either focus on a particular ethnic group or groups, or use a comparative approach to the study of patterns of cultural development, immigration, and assimilation, as well as the contributions of specific ethnic or cultural groups. The course may also include analysis of the political impact of ethnic diversity in the United States.

Indiana Studies

Grades 10-12

1 credit

Prerequisite: None

Indiana Studies is an integrated course that compares and contrasts state and national developments in the areas of politics, economics, history, and culture. The course uses Indiana history as a basis for understanding current policies, practices, and state legislative procedures. It also includes the study of state and national constitutions from a historical perspective and as a current foundation of government. Examination of individual leaders and their roles in a democratic society will be included and student will examine the participation of citizens in the political process. Selections from Indiana arts and literature may also be analyzed for insights into historical events and cultural expressions.

International Relations (Offered 2023-2024)

Grades 10-12

1 credit

Prerequisite: None

Note: Offered alternate years as Political Science

International Relations provides a survey of the formal relations among sovereign states in the international system, emphasizing the operation of diplomacy. The procedures for settlement of disputes and various methods of international conflict resolution are included. An understanding of U.S. foreign policy decision-making and the U.S. relationship with global policies will be studied. This course examines power, interdependence, global development, and international organizations, such as the United Nations. Participation in the Model U.N. club is strongly encouraged.

Law Education

Grades 10-12

1 credit

Prerequisite: U.S. Government (recommended)

Law Education provides an understanding of the American legal system and its basis in the United States Constitution. The course is designed to promote an understanding of society and its system of laws by indicating how citizens may effectively function within the law. Ways of dealing with interpersonal conflict in order to secure constructive change are included, along with the development of critical thinking and problem solving skills. Case studies, field trips, simulations, and mock trials will be used in this course whenever feasible. Students are encouraged to participate in Mock Trial while enrolled in this course.

Political Science (Offered 2022-2023)

Grades 10-12

1 credit

Prerequisite: U.S. Government (recommended)

Note: Offered alternate years as International Relations

Political Science provides for a study of the processes and goals of politics; processes of government; methods by which decisions are made; and the basis of decision making. The course goes beyond the study of governmental structure and functions to include and analysis of topics such as: (1) the nature of the American party system, (2) interest groups, (3) public opinion, (4) laws which affect students, (5) reasons laws are changed, (6) due process of law, (7) legal rights, and (8) legal responsibilities. Comparative studies of governmental systems in nations other than the United States may also be included. Students will organize and moderate the Mock Presidential Election at Guerin Catholic.

Psychology

Grades 10-12

1 credit

Prerequisite: None

Psychology is the scientific study of human behavior and mental processes. This course exposes students to the subject and prepares students for an introductory college psychology course. The standards have divided the course into six content areas. Scientific method explores research methods and ethical consideration. The biological basis focuses on the way the brain and nervous system function, including sensation, perception, motivation, and emotion. Cognitive aspects of the course focus on learning, memory, information processing, and language. Mental health topics include psychological stress, disorders, and treatment. Socio-cultural dimensions of behavior deal with topics such as conformity, obedience, perceptions, attitudes, and influence of the group on the individual. Developmental psychology takes a lifespan approach to physical, cognitive, language, emotional, social, and moral development.

Psychology, Standard Level, International Baccalaureate

Grades 11-12

2 credits

Prerequisite: None

The IB Psychology Standard Level course aims to develop an awareness of how research findings can be applied to better understand human behavior and how ethical practices are upheld in psychological inquiry. Students learn to understand the biological, cognitive and sociocultural influences on human behavior and explore alternative explanations of behavior. They also understand and use diverse methods of psychological inquiry. Students will also develop research and writing skills to carry out an experimental study.

World History and Civilization

Grades 10-12

1 credit

Prerequisite: None

World History and Civilization provides for a study of selected world cultures, past and present. The content of this course provides a basis for students to compare and analyze patterns of culture, emphasizing both the diversity and commonality of human experience and behavior. This course emphasizes the interaction of local cultures with the natural environment, as well as the connections among civilizations from earliest times to the present. This course may be designed to focus on: prehistory; early world civilizations, including the rise of civilizations of the Middle East, Africa, and Asia; the classical civilizations of Europe, Asia, Africa, and Latin America; and the development of modern societies. Topics include Rome, Middle Ages, Absolutism and the French Revolution.

THEOLOGY

The theology department, in conjunction with campus ministry, plays a central role in Guerin Catholic's mission as a Roman Catholic diocesan high school called to offer students the opportunity to know and love the Person of Jesus Christ, His teachings, His Body, the Church, and each human person. The theology curriculum provides students with a broad and unified foundation of Catholic teaching found in Sacred Scripture and Sacred Tradition, so as to understand the essentials of a Christian life lived in worship of God, love of neighbor, and personal holiness.

In order to continue to address the needs of Guerin Catholic students, the theology course of study has been reviewed and revised over the last few years. The revised theology course of study aligns with the *Doctrinal Elements of a Curriculum Framework*, published under the auspices of the United States Conference of Catholic Bishops (USCCB) in 2007. Courses are normally taken in the given order. Courses labeled A & B are interchangeable options for a required course in the given grade level, depending on the needs of the student. The guidance office will counsel full IB students about the order in which they take the required upperclassmen theology courses.

Required Courses

Theology 1A Introduction to Catholicism

(Fulfills the requirement for 1B)

Grade 9

1 credit

This course is designed for students whose comprehension and personal comfort in future theology classes would benefit from a systematic and positive presentation of the fundamentals of the Catholic Faith. The course gives an overview of the major beliefs that are at the heart of the Faith, with an emphasis on the existence and Revelation of God, the Bible and the

relationship between the Old and New Testaments, the Person of Jesus Christ and the Paschal Mystery, and the role of grace in the believer's response of holiness to God's Revelation by the moral life and prayer.

Theology 1B Introduction to Catholicism

Grade 9 **1 credit**

This course is designed to deepen and build on a previously laid foundation of the fundamentals of the Catholic Faith. The students will be led to further develop their Catholic worldview, centered on Jesus Christ and the plan of His salvation. They will be challenged to encounter the inexhaustibility of the mysteries of God revealed in Scripture and Tradition. They will reflect on the characteristics of a life of holiness made possible by grace. They will examine the relationship between faith and logic and learn an appropriate use of the apologetics method by which to explain to others the truths revealed by God.

Theology 2 Jesus Christ & The Blessed Trinity

Grade 9 **1 credit**

“The purpose of this course is to introduce students to the mystery of Jesus Christ, the living Word of God, the Second Person of the Blessed Trinity. In this course, students will understand that Jesus Christ is the ultimate Revelation to us from God. In learning who He is, the students will also learn who He calls them to be.” - USCCB’s Doctrinal Elements of a Curriculum Framework

This course deepens the student's understanding of God's revelation of Himself and the human person's response of faith. The student will study the nature of the Trinity and the Incarnation of Jesus Christ, Who reveals to humanity in His words and deeds the face of God the Father and the love of God the Holy Spirit. In learning who Christ reveals Himself to be, the student will also continue to learn about the human person's call to union with the Trinity by grace and the holiness of life that results from cooperating with the grace given by Christ.

Theology 3 The Paschal Mystery

Grade 10 **1 credit**

“The purpose of this course is to help students understand all that God has done for us through his Son, Jesus Christ. Through this course of study, students will learn that for all eternity, God has planned for us to share eternal happiness with him, which is accomplished through the redemption Christ won for us. Students will learn that they share in this redemption only in and through Jesus Christ. They will also be introduced to what it means to be a disciple of Christ and what life as a disciple entails.” - USCCB’s Doctrinal Elements of a Curriculum Framework

In this course, students will learn that for all eternity, God has planned for us to share in His eternal happiness and that this plan of salvation is accomplished through the Redemption Christ won for us. Students will learn that after the Fall, this Redemption is prefigured and prepared for by the covenants of the Old Testament, and that in all His words and deeds, Jesus reveals the Father's will to save us through His redeeming Passion, Death, and Resurrection. Students will deepen their understanding of what it means to respond to the grace of Redemption as a disciple of Christ and what life as a disciple entails.

Theology 4 Church History

Grade 10 **1 credit**

“The purpose of this course is to help the students understand that in and through the Church they encounter the living Jesus Christ. They will be introduced to the fact that the Church was founded by Christ through the Apostles and is sustained by him through the Holy Spirit. The students will come to know that the Church is the living Body of Christ today. This Body has both divine and human elements. In this course, students will learn not so much about events in the life of the Church but about the sacred nature of the Church.” - USCCB’s Doctrinal Elements of a Curriculum Framework

The purpose of this course is to help the students understand that in and through the Church they encounter the living Jesus Christ most fully. They will learn how Christ established the Church on the foundation of the Apostles and animates her with the Holy Spirit. The students will come to know that the Church is the living Body of Christ today, which has both divine and human elements. In this course, students will learn about the sacred nature of the Church and highlights of the good done by the Church for civilization throughout history, and be introduced to the Church's historical relations with non-Catholics.

Theology 5 Moral Theology

Grade 11 **1 credit**

“The purpose of this course is to help students understand that it is only through Christ that they can fully live out God’s plans for their lives. Students are to learn the moral concepts and precepts that govern the lives of Christ’s disciples.” - USCCB’s Doctrinal Elements of a Curriculum Framework

In this course, students will develop an understanding of the human person’s desire for infinite happiness, the role of human freedom in finding happiness, the role of moral law, and the necessity of grace that enables us to live a moral life in union with the life of Jesus Christ, so as to find happiness. Students will learn the moral concepts and precepts that point out the authentically good choices by which Christ’s disciples live their lives in holiness and experience long-term happiness in this life and in the next.

Theology 6 The Liturgy & Sacraments

Grade 11 **1 credit**

“The purpose of this course is to help students understand that they can encounter Christ today in a full and real way in and through the sacraments, and especially through the Eucharist. Students will examine each of the sacraments in detail so as to learn how they may encounter Christ throughout life.” - USCCB’s Doctrinal Elements of a Curriculum Framework

This course deepens the student's understanding of the liturgy and sacraments as the primary place of encounter between Jesus Christ, His Body the Church, and the individual believer, and as the primary channel through which He pours out the grace that transforms the believer into the image of the Son in relationship with the Father. The student will understand that Christian liturgy not only recalls the events that saved us but actualizes them, makes them present, and that by it, the believer is freed to begin participating in the heavenly liturgy of adoration and love that characterizes eternal life. The student will learn the necessary personal dispositions by which one accepts the transformative power of the sacraments so as to live a life of virtue and holiness in cooperation with God's grace.

Theory of Knowledge, International Baccalaureate (Required for full diploma IB students only)

Grade 11-12 **2 credits**

The focus of the IB Theory of Knowledge (TOK) course is to examine what we know in the various fields of knowledge and how we know it. The Theory of Knowledge course will engage students in critical reflection of the sources and bases of knowledge in various systems of thought and belief and how they relate to Catholic epistemology (philosophy of knowing). Students will be able to understand and evaluate sources, modes, biases, strengths, and limits of experience as a “knower.” Students will understand the difference between a relativistic perspective and objective truth that can be known with certitude.

Theology 7 Christian Vocation

Grade 12 **1 credit**

“The purpose of this course is to help students to understand the vocations of life: how Christ calls us to live. In this course, students should learn how all vocations are similar and how they differ. The course should be structured around married life, single life, priestly life, and consecrated life. Students should learn what it means to live life for the benefit of others and the value in considering a vocation in service to the Christian community” - USCCB’s Doctrinal Elements of a Curriculum Framework

This course provides students with the opportunity for deep self-reflection and interiorization of the first vocation of every Christian, the universal call to holiness. Therefore, while fully respecting the freedom of the students, the course will discuss personal holiness and prayer as a response of love to Christ’s call made possible by His grace. The students will grow in self-knowledge and deepen their understanding of how Christian friendship lived as a sincere gift of self is beneficial to their daily relationships. The student will study the different vocations of life to which they could be called to make a life-long gift of self: married life, single life for the Kingdom, priestly life, or consecrated life.

Theology 8 Catholic Social Teachings

Grade 12 **1 credit**

Also offered as a blended Summer School course to rising juniors and seniors or those needing credit recovery.

French 1**Grades 9-12****2 credits****Prerequisite: None**

French 1 introduces students to effective strategies for beginning French language learning and to various aspects of French-speaking culture. This course encourages interpersonal and interpretive communication through speaking, writing, reading and listening activities. Students who complete French I successfully can describe in French using memorized lists and short sentences in the present tense. Additionally, students will examine the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of French-speaking culture.

French 2**Grades 9-12****2 credits****Prerequisite: French 1**

French 2 reviews and builds upon the topics and skills developed in French 1 so that students will be able to speak and write in French in expanded contexts and become more self-directed and confident in using French in everyday situations. This course encourages interpersonal and interpretive communication through speaking, writing, reading and listening activities. Students who complete French 2 successfully can describe in French using lists, short sentences, transition words and simple paragraphs. They will be able to use contextual clues to infer meaning and to comprehend longer written and oral directions. Additionally, students will continue to learn about the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of French-speaking culture.

French 3 (Honors)**Grades 10-12****Prerequisite: French 2**

French 3 reviews and builds upon the topics and skills developed in French 2 so that students will be able to speak and write the language in a greater variety of contexts and become increasingly more self-directed and confident in using French in everyday situations. This course encourages further development of interpersonal and interpretive communication through more advanced speaking, writing, reading and listening activities. Students who complete French 3 successfully can participate in spoken and written communication by creating sentences and paragraphs of greater complexity relating to a wider range of topics. Additionally, students will deepen their understanding of the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of French-speaking culture.

IB French SL**Grade 11-12****2 credits****Prerequisite: French 3 and teacher recommendation**

IB French, Standard Level is a world language course established by the International Baccalaureate Organization. The primary focus of the course is on language acquisition and development of interpersonal and interpretive communication skills through exposure to a range of written and spoken material, such as oral exchanges and print information regarding current culturally and globally relevant topics. Students who successfully complete IB French SL can participate in spoken and written communication of increasing complexity across various time frames, ask a variety of questions, make comparisons, express opinions and synthesize information successfully in French. Students will deepen their understanding of Francophone cultures by exploring their products (e.g., art, books, music, laws, conventions, institutions); practices (patterns of social interactions); and perspectives (values, attitudes, and assumptions).

Latin 1**Grades 9-12****2 credits****Prerequisite: None**

Latin 1 introduces students to the basic grammar and vocabulary of Latin. In addition to developing a firm, grammatical foundation for all other levels of Latin, students will begin exploring the history, culture, and mythology of the ancient

Romans. They will dive into the wisdom of the ancients through authentic literature and come to appreciate the influences of the ancient world on the modern, especially through some of the world's great works of art, and through unique projects, they will attempt to draw closer to life in the ancient world. Students will also grow in their faith through daily interactions with Latin Scripture.

Latin 2

Grades 9-12 **2 credits**

Prerequisite: Latin 1

Latin 2 completes the core grammar of Latin. Students will develop mastery of their linguistic skills by reading authentic, Roman-authored literature, which may include selections from the history of Livy, the commentaries of Caesar, and the Latin translation of Homer's *Iliad*. Students will begin composition in Latin and will expand their knowledge of the ancient world through an introduction to ancient Greek. A key project will see them applying their knowledge of the ancient world to address problems faced by the Roman army. This project will help students develop skills of research and application core to the IB philosophy. They will also continue to grow in their faith through daily interactions with Latin Scripture and through a deeper look at famous Latin hymns.

Latin 3 (Honors)

Grades 10-12 **2 credits**

Prerequisite: Latin 2

Latin 3 gives students the opportunity to use what they have mastered in the first two levels by exploring deeply works of history, law, philosophy, and poetry. Authors may include Eutropius, Cicero, Sallust, Seneca, Vergil, Catullus, and Horace. As in other levels, students will have the opportunity to connect more closely with the ancient world through unique projects, which may involve spoken Latin and medieval calligraphy. Students in Latin 3 will continue to grow in their faith through daily interactions with Latin Scripture and through exploring works from writers such as St. Augustine, St. Anselm, and St. Aquinas. Students completing Latin 3 will be well prepared for IB Latin the following year.

IB Latin SL

Grades 11-12 **2 credits**

Prerequisite: Latin 3 and teacher recommendation

The IB Latin curriculum will follow the IB Standard Level syllabus. This will see students reading selections from the poetry of Vergil, Ovid, Catullus, and Horace. In addition to preparing for exams on those authors and the required Internal Assessment, they will explore the influences of these seminal authors throughout the ages and will also compose written works of their own in Latin. As in the other years, students will continue to grow in their faith through daily interactions with Latin Scripture and by examining the classical works of literature from a Christian perspective.

Spanish 1

Grades 9-12 **2 credits**

Prerequisite: None

Spanish 1 introduces students to effective strategies for beginning Spanish language learning and to various aspects of Spanish-speaking cultures. This course encourages interpersonal and interpretive communication through speaking, writing, reading and listening activities. Students who complete Spanish I successfully can describe in Spanish using memorized lists and short sentences in the present tense. Additionally, students will examine the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of Spanish-speaking cultures.

Spanish 2

Grades 10-12 **2 credits**

Prerequisite: Spanish 1

Spanish 2 reviews and builds upon the topics and skills developed in Spanish 1 so that students will be able to speak and write in Spanish in expanded contexts and become more self-directed and confident in using Spanish in everyday situations. This course encourages interpersonal and interpretive communication through speaking, writing, reading and listening activities. Students who complete Spanish II successfully can describe in Spanish using lists, short sentences, transition words and simple paragraphs. They will be able to use contextual clues to infer meaning and to comprehend longer written and oral

directions. Additionally, students will continue to learn about the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of Spanish-speaking cultures.

Spanish 3 (Honors)

Grades 11-12

2 credits

Prerequisite: Spanish 2

Spanish 3 reviews and builds upon the topics and skills developed in Spanish 2 so that students will be able to speak and write the language in a greater variety of contexts and become increasingly more self-directed and confident in using Spanish in everyday situations. This course encourages further development of interpersonal and interpretive communication through more advanced speaking, writing, reading and listening activities. Students who complete Spanish 3 successfully can participate in spoken and written communication by creating sentences and paragraphs of greater complexity relating to a wider range of topics. Additionally, students will deepen their understanding of the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of Spanish-speaking cultures.

Spanish-Language and Culture (Honors)

Grades 10-12

1 credit

Prerequisite: Spanish 3 (H)

The Spanish Language and Culture class is an advanced Spanish course open to students who have completed Spanish III or IB Spanish. It is a one-semester class covers literature, history, geography, and culture of the Spanish-speaking world. The course is intended for students who have a keen interest in improving their ability to communicate in Spanish and in learning more about the Spanish-speaking world. The course emphasizes effective communication of ideas in Spanish and Spanish will be the primary language of communication used by the teacher and the students. The course engages students in an exploration of culture in both contemporary and historical contexts. It develops students' awareness and appreciation of Hispanic and Spanish cultural products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions).

IB Spanish SL

Grade 11-12

2 credits

Prerequisite: Spanish 3 and teacher recommendation

IB Spanish, Standard Level is a world language course established by the International Baccalaureate Organization. The primary focus of the course is on language acquisition and development of interpersonal and interpretive communication skills through exposure to a range of written and spoken material, such as oral exchanges and print information regarding current culturally and globally relevant topics. Students who successfully complete IB Spanish SL can participate in spoken and written communication of increasing complexity across various time frames, ask a variety of questions, make comparisons, express opinions and synthesize information successfully in Spanish. Students will further deepen their understanding of the products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions) of Spanish-speaking cultures.
