GUERIN CATHOLIC HIGH SCHOOL
MEASLES

MEASLES

Currently, there are **no reported cases of measles in Hamilton County**. However, given the increasing prevalence of measles in Indiana and the upcoming holiday travel season, we have been advised to review current school policy and health department recommendations. We want our families to be informed about the steps we would take should an outbreak affect our school community.

What does the Guerin Catholic Family Handbook say? In the case of an outbreak of a disease for which there is an Indiana required school vaccine, Guerin Catholic will follow state and local health department recommendations on exclusion. It is important to note that with some diseases, such as measles, one infected student in the building may be considered an outbreak.

What would a measles outbreak mean for our school community?

Based on current health department recommendations, the following procedures would apply:

Students, faculty, and staff who meet state vaccination requirements: may continue to attend school and all activities without limitations, unless they develop symptoms.

Students, faculty, and staff who do not meet state vaccination requirements would be excluded from school and all school-sponsored activities consistent with health department guidance.

What should you do if you believe your student has been exposed to measles outside of Guerin Catholic? Call your student's pediatrician/physician immediately and notify the school nurse so that appropriate precautions and guidance can be provided.

Our goal is to remain proactive, informed, and prepared while prioritizing the health and safety of our entire Guerin Catholic community.

For questions about health concerns or potential exposure, please contact our school nurses.

For questions regarding school policy and procedures, please reach out to Mr. Jeff Bach, Assistant Principal of Student Services.

Thank you for your partnership.
